

# We're hiring!

We are currently  
looking to hire a

## ***Data Analyst***

### **Who are we?**

Ringier South Africa is looking to hire a ***Data Analyst***.

We are a technology company supporting international marketplaces based in Cape Town, South Africa and Mauritius. Not based in South Africa or Mauritius? We hire outside of South Africa (+/- 3 hours from SAST).

We build and maintain the tech for Classifieds Marketplaces across the world. Our platforms attract millions of views per month, and are market leaders in their respective countries. We aim to solve all of the technical requirements for running a highly scalable, highly available marketplace business. It does this while still giving local customisations for different countries and continuously improving from what we've learnt in other markets.

### **Why work for us?**

- We are fully remote! Work from anywhere in the world within a 3 hour SAST timezone
- We have co-working spaces in Cape Town, Mauritius, Kenya & Nigeria
- A cutting-edge development stack is waiting for your code contribution
- You will be working with over 80+ highly skilled technical minds (and expanding)
- Backing of the international media powerhouse Ringier AG, which allows us to access world class development resources, shared knowledge and a wealth of international business insights.
- Our teams work with a wide range of tech stacks.
- We are committed to the future growth prospects of our employees by allowing autonomy, flexibility and an opportunity to master your respective skill.
- Access to Employee Assistance Programs with 24/7 counselling services available
- Generous leave policies

### **What will you do?**

- Analyse complex data using our Palantir Foundry analysis tool , Athena, and Python, to provide support for our AI product development
- Support data engineers and data scientists with analysis and data requirements
- Analyse performance of AI implementations and report results to stakeholders
- Conduct in-depth data analysis to understand data quality, structure, and pipelines.

### **Our tech stack**

- Pyspark / Python / SQL
- Github / Github Actions / Jenkins
- AWS / GCP / Azure / Palantir Foundry

### **What will you bring?**

- Relevant bachelor's degree or equivalent experience
- Minimum of 3 years of experience
- Knowledge of PySpark and distributed computation
- Highly efficient in ETL processes
- Proficiency in Python and SQL
- Strong analytical skills with high attention to detail.
- Proven knowledge of software development best practices
- Experience with Agile methodology and problem-centric solution design
- A pragmatic mindset, not afraid of making mistakes, and learning from them
- Strong communication and interpersonal skills
- You're a team player, have great communication skills and are interested in technical things

Send your CV to [hr@ringier.co.za](mailto:hr@ringier.co.za)

**Should you not hear from us after 4 weeks of submission of your CV, please consider your application unsuccessful.**
