

We're hiring!

We are currently looking to hire a

Senior Full-Stack Developer

Who are we?

Ringier South Africa is a technology company supporting international marketplaces.

We build and maintain the tech for Classifieds Marketplaces across the world. Our platforms attract millions of views per month and are market leaders in their respective countries. We aim to solve all of the technical requirements for running a highly scalable, highly available marketplace business. It does this while still giving local customizations for different countries and continuously improving from what we've learned in other markets.

You'd be joining the property team working on some of the biggest property marketplace platforms in Africa. This could give you the space to flex your dev muscle in a small, highly-skilled, efficient team. Due to the nature and stage of the team, we're expecting successful applicants to have a delivery-first mindset and a strong self-motivated workflow.

Why work for us?

- We are fully remote! Work from anywhere in the world within a 3 hour SAST timezone
- We have co-working spaces in Cape Town, Mauritius, Kenya & Nigeria
- A cutting-edge development stack is waiting for your code contribution
- You will be working with over 80+ highly skilled technical minds (and expanding)
- Backing of the international media powerhouse Ringier AG, which allows us to access world-class development resources, shared knowledge, and a wealth of international business insights
- Our teams work with a wide range of tech stacks
- We are committed to the future growth prospects of our employees by allowing autonomy, flexibility and an opportunity to master your respective skill
- Access to Employee Assistance Programs with 24/7 counselling services available

What will you do?

- Design and implement new features and enhancements using modern JS, HTML, CSS and PHP
- Experience with Blade templates and Laravel an advantage
- Fix bugs assigned during the sprint planning process.
- Design code, innovate and solve complex problems inherent in operating a high scale classifieds platform.
- Play a key role in reviewing and approving work of your peers as part of the software development process.
- Use prescribed tools and work according to the established Ringier South Africa software development process.
- Work closely with the UI and UX team to translate designs into code.
- Participate in the scrum process and daily stand-ups.
- Assist Head of Engineering and Product Manager with compilation of technical specifications.
- Serve as a resource and mentor for less experienced developers

Our tech stack

- PHP
- TALL Stack (Tailwind, AlpineJS, Laravel, Livewire)
- Laravel Nova
- PHPUnit / Dusk / Cypress Test Suites.
- MySQL (AWS Aurora)
- Jenkins
- Redis
- Memcached
- GitHub
- Datadog
- Docker
- Cloudflare
- Datadog

What you will need

- Degree / Diploma preferred but not required
- 5+ years in tech/development roles
- Firm grasp of Laravel framework (v9.0 and later) with a focus on Blade templating and highly competent in software design patterns
- Firm grasp of Tailwind CSS framework or another “utility-based” CSS approach preferred by not required.
- Solid understanding of Vue.js and/or React javascript frameworks
- Proficiency in MySQL, Redis, Memcached and related storage technologies advantageous.
- Solid experience with Continuous Integration, Git and Linux.
- Strong interpersonal skills
- Able to work with a diverse team which includes remotely located staff and developers.
- Ability to explain technical matters to non-technical staff

- Ability to work from your location with your own fast and stable internet connection as well as a productive home office workspace.
- Professional, self-motivated attitude.
- Proficient in written and oral English communication.
- High attention to detail

Send your CV to hr@ringier.co.za

Should you not hear from us after 4 weeks of submission of your CV, please consider your application unsuccessful.
