

We're hiring!

We are currently
looking to hire a

Senior Full Stack Developer (AI)

Who are we?

Ringier AG is a diversified media company with about 7,300 employees across 19 countries. Founded in 1833, Ringier manages leading brands in print, TV, radio, online and mobile media and runs successful print, entertainment, and internet businesses. In a history that spans more than 180 years, Ringier stands for a pioneering spirit, independence, freedom of expression and diversity of information. Ringier is a Swiss family-owned business with head offices in Zurich.

We are seeking a highly skilled and experienced **Senior Full Stack Developer** to join our dynamic team. The ideal candidate will have a strong background in full stack development, with specific passion to integrate AI into their way of work.

Why work for us?

- We are fully remote! Work from anywhere in the world within a 3 hour SAST timezone
- We have co-working spaces in Cape Town, Mauritius, Kenya & Nigeria
- A cutting-edge development stack is waiting for your code contribution
- You will be working with over 80+ highly skilled technical minds (and expanding)
- Backing of the international media powerhouse Ringier AG, which allows us to access world class development resources, shared knowledge and a wealth of international business insights
- Our teams work with a wide range of tech stacks
- We are committed to the future growth prospects of our employees by allowing autonomy, flexibility and an opportunity to master your respective skill
- Access to Employee Assistance Programs with 24/7 counselling services available

What will you do?

- Your mission is to design, build, implement and maintain high performance full stack applications
- Developing functions to interact with Palantir Ontology
- Integrate AI models and solutions into existing and new platforms and applications
- Work with Palantir's suite of tools to analyse and interpret complex data sets
- Collaborate with cross-functional teams to define, design, and deliver new features.
- Optimise applications for maximum speed and scalability.
- Write clean, maintainable, and efficient code in Python and other relevant programming languages.
- Participate in code reviews and mentor junior developers.
- Stay updated with the latest industry trends and technologies to ensure our solutions remain cutting-edge.
- Come up with unique solutions to complex problems
- Delivery - Deadlines can be tight, we like to move quickly
- Get involved in the lifecycle of our products
- Able to solve complex and unique software problems
- Design and implement new features and enhancements

Our tech stack

- Typescript / Python / SQL / Javascript
- Github / Github Actions / Jenkins
- AWS / GCP / Azure / Palantir Foundry

What you will need

- Bachelor's or Master's degree in Computer Science preferred but not required
- 7+ years professional experience in full stack development
- Any experience in data modelling / manipulation
- Proficiency in Python
- Experience working with Palantir highly desirable
- Proven experience with front-end and backend technologies
- Experience with AWS or similar preferable and containerisation tools
- Analytical and strong problem solving skills with a high degree of attention to detail
- Able to work autonomously in all stages of development including coding standards, code reviews, source control management, build processes and testing
- Ability to work from your location with your own fast and stable internet connection as well as a productive home office workspace.
- Strong communication and teamwork abilities
- Proficient in written and oral English communication.

Send your CV to hr@ringier.co.za

Should you not hear from us after 4 weeks of submission of your CV, please consider your application unsuccessful.
